

A Full Range of Infrared Space Heating Equipment

Series U - Single Stage Infrared Heaters

Model UAB - Low intensity gas fired infrared heater - 40,000 - 205,000 Btu/Hr - lengths 10' to 70' - NG or LPG. Competitively priced and packaged to maximize configurations while minimizing inventory.

Model UA - Heavy duty industrial/commercial infrared heater with a built in low voltage option, featuring the best overall performance in the industry. 40,000 - 220,000 Btu/Hr with 100% efficient reflector.

Model UX - Features an enclosed burner design further enhancing all of the great features of the UA for hard service applications.

Model UXR - includes all of the above features in a Model UX plus ... the burner box is sealed for harsh environments and heat-treated aluminized is standard tube supplied. CSA approved for outdoor use.

Series T - Two Stage Infrared Heaters

Model TA

Model TX

Model TXR

Same great features as the Model UA/UX/UXR with added Hi-Low capability which allows quicker recovery on the high fire and economical steady operation on the low fire.

Series L - Long, Low & Even Heat Infrared Heaters

Model LA

Model LX

Model LXR

Designed for low ceiling applications including animal confinement, hallways and service counters. All of our Series L units include our patented design which provides unequalled even heat distribution with end-to-end output variance of less than 15%.

Series LT - Even Heat Two Stage Infrared Heaters

Model LTA

Model LTX

Model LTXR

All the features of the award winning Model LA/LX/LXR now available with two-stage control providing energy efficient, comfortable, even heat.

SUPERIOR TECHNOLOGY • SUPERIOR PERFORMANCE

Choose the Model Designed for YOUR Application

Premier VS Vacuum Series Infrared Heating System

The **Premier VS Vacuum Series** is custom engineered to precisely fit your building requirements. Unique in-series patented burner rates range from 60,000 BTU to 250,000 BTU. Total system can accommodate as much as 1.2 million BTU's on a single vacuum pump. SRP offers the flexibility of fixed rate ON/OFF, two stage or AccuRate control - depending on your requirements.

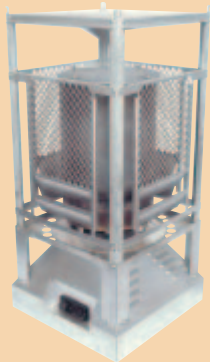

SRP Accu-Rate Control Modulating Control System

Controls the firing rate of the Premier VS Vacuum Series System between 60% and 100% Unparalleled individual zone modulation. Up to four heating zones per system.

Specialty Heaters

Construction Heaters

*When Performance Matters
in Temporary Heat*

Modulating burner control
60,000-100,000 Btu/Hr
NG or LPG

Patio Heaters

Comfort & Efficiency

Hi-Low Controls
53,000-46,000 Btu/Hr
Upright or Hanging Model

*Honoring leaders in
Innovation, Design & Technology*

Series GR

Residential Garage Heaters

Preassembled especially for garages, workshops and light industrial use

Rates 30,000 and 45,000 Btu/Hr • NG or LPG
Direct Spark Ignition • Outdoor Kit available

Series S

High Intensity Ceramic Heater

Heavy Duty Construction

- 82% Efficiency
- 30,000-160,000 Btu/Hr
- Direct Spark or Millivolt
- NG or LPG

“STATE-OF-THE-ART” TECHNOLOGY

Technologically advanced product design • Factory support and design assistance
